

SENSES AMBIENT NOISE OPTIMIZES PAGING LEVEL TO SURROUNDINGS

Uses its internal microprocessor with a microphone input to sense ambient noise, and optimizes the paging level to its surroundings.

- Ideal for areas where noise levels frequently change.
- Paging is automatically adjusted when the ambient noise levels change
- The unit has a manual or remote control of these levels
- Microphone may be placed up to 5,000 feet from the main unit
- Contact Closures included may be wired to shut existing volume controls to electrically remove the volume control from the circuit when the noise levels increase
